Biosuccinium[®] S Grade Approved 100% Natural By ECOCERT

4 April 2017

Reverdia's new Biosuccinium[®] S grade has been registered under the ECOCERT Natural and Organic Cosmetics Standard, meaning it has been approved as 100% natural origin. This new grade of bio-succinic acid will enable high-quality bio-based personal care products such as body cleansers, shampoos and soaps. Biosuccinium[®] S grade can also be used in cosmetics products like creams, lotions, masks and hair care products.

ECOCERT was set up in 2003 and was the first certification body to develop standards for natural and organic cosmetics. Its certification is the global reference for cosmetics, currently supporting over 1,000 companies in more than 40 countries.

"ECOCERT is the benchmark for Natural Certification and customers can use bio-based Biosuccinium[®] S to develop sustainable products," said Pascal Moritz, New Business Development Manager at Reverdia. "This new cosmetics grade offers a pure and 100% natural product."

Biosuccinium[®] S is used in cosmetics and personal care products

About Reverdia

Reverdia enables the bio-based materials of tomorrow with its industry-leading Biosuccinium[®] offering. It works with brand owners and manufacturers on application co-development for sustainable products. Produced since 2012, Biosuccinium[®] is sold globally. The Biosuccinium[®] Technology is also offered under license to value chain partners and co-producers.
